

# VIRTUALCARE Patient Self Registration

Use **Google Chrome** to register for your account

## Get the app!

VirtualCare app is available through the app store for Android and iOS.

## Connect with your primary care provider!

Your provider is now offering virtual visit appointments. A virtual visit will allow you to have an appointment with your provider through secure chat messaging, phone or video.

A virtual visit is **NOT** intended for urgent medical issues and does not replace an in-person appointment when necessary.

Some health concerns that you *might* see your provider for virtually may include:

- cold and flu
- chronic conditions
- cough, sore throat
- some skin conditions
- follow-up on blood work or other test results
- mental health concerns
- seasonal allergies
- some medication renewals

## How to create your VirtualCare account:

1. Go to <https://virtualcare.thinkresearch.com/login>
2. Click **Sign Up**.
3. Enter your **First Name, Last Name** and **Email**.
4. When complete, click **Request an invite**.
5. Check your email (*it may be in your junk folder*). There will be a '**Sign Up for your account!**' email. Click **Register for VirtualCare**.
6. Follow the prompts and enter the required information to create your account.

If you have problems activating or accessing your account, please

contact the support line at:

**1-800-559-3041**

(Monday-Friday; 9:00am – 5:00pm).
