Kitchener-Waterloo & Area Family Medicine Residency Program

New Vision 
Family Health Team

New Vision Family Health Team

- New Vision FHT is located in Kitchener, just a few minutes away from the main teaching site. The multi-disciplinary team of professionals are committed to excellence in the provision of high quality, patient-centered primary healthcare services offered in a caring, coordinated, and responsive manner.
- Fifteen family physicians practice out of their main location on Greenbrook Drive.
- The site offers a wide variety of programs and services for its patients working with their team of interdisciplinary health care professionals. Some of these program include:
 - Circumcision Clinic; Breastfeeding Clinic; Hypertension Management Program; Diabetes Management; Mental Health Program; and many more
- One resident may be placed at this location.
- For more information about [New Vision FHT](#) please visit their website.

Building & Patient Waiting Area

Exam Rooms

Lunch Room and Resident Area

Resident Perspectives

“I've had a wonderful experience at the New Vision FHT! New Vision has a large multidisciplinary team and everybody is very kind and welcoming. I've had the opportunity to work with various physicians who have all been great teachers. The pharmacists, dietitians, and social workers are also readily available to answer questions and are happy to teach us as well. I've had multiple experiences where our pharmacists pulled me aside to observe their medication counselling, which has been so beneficial for my learning. Additionally many of the physicians at New Vision offer special clinics such as breastfeeding, OB, circumcisions, and memory clinic.”

-PGY2 Farah Henry, Class of 2025

“Undertaking residency at New Vision has been an incredible experience. The preceptors are all so supportive and create a safe and positive learning environment. There is no shortage of opportunities that are available by all the physicians at New Vision - from procedures like circumcisions, IUD insertions/removals, skin biopsies, to low-risk OB care. Additionally, having such a large multi-disciplinary team within the clinic for immediate advice/support is an invaluable resource.”

-PGY2 Veerta Singh, Class of 2025

Resident Perspectives

Advantages

- So many resources and feels like an academic clinic with ample supports
- All the physicians and allied health are invested in your learning
- High exposure to obstetrics and gynecology
- Lots of locum opportunities for residents in the clinic upon graduation
- Several opportunities to do procedures
- Speciality clinics like breastfeeding clinic and memory clinic
- Easy access to pharmacy staff and NPs to ask questions or learn skills like Paps, etc.
- Feels like a big family (potluck lunches, team building activity days)
- Free parking

Disadvantages

- You are often the only resident in the clinic (can be lonely and isolating)
- Not many opportunities to meet other residents compared to CFFM Victoria St.
- Not very reflective of many practices in the future because this clinic is so well run and supplied
